**Importance:** High

Molly-

ATSDR will evaluate the data as it's collected. Mark has proposed the use of a number for short term data (intermediate exposures), which theoretically we could use to draft something sooner. I left him a VM this morning (I'm not in today) to see if he has heard anything back about using the provisional number. We have also drafted a statement that includes language that we will evaluate the data as it continues being collected and make health-protective recommendations to our partner agencies, so it's implied that we will evaluate shorter term data. I'm not sure where the statement is in the clearance chain, but will check on that.

Thx

Michelle

It was our impression that ATSDR may be able to make a determination or response prior to receiving a year's worth of data; however that decision needed to be made at a higher level. Want to know if there's any possibility that ATSDR may make a statement earlier than we originally thought.

Lots of discussions. Refresh my memory what you need from us in light of the NOV.

Michelle –

Wanted to touch base and see if any decisions were made as a part of your discussions this week.

**Subject:** Update

This, of course, requires more discussion, and with CDC. We are meeting next week and are starting with Q&As today. When do you think the data will be posted?
